

RAO SNEHIN

 RaoSnehin |  Snehin Rao |  snehinrao1930@gmail.com |  +91-9346101099

SUMMARY

Computer Science Engineering student specializing in scalable systems, full-stack frameworks, and cloud architecture. Proven track record of developing end-to-end applications, optimizing containerized deployments via Kubernetes/Docker, and building distributed big data pipelines to streamline performance. Proficient in Java, Python, and SQL with a strong command of Data Structures, Algorithms, and Object-Oriented design principles. Adept at collaborating in agile environments to deliver robust, low-latency software solutions that optimize system efficiency.

EDUCATION

Jul 2023 – Present	B.Tech, CSE (AI), Amrita Vishwa Vidyapeetham , Bengaluru	CGPA: 8.00
Jun 2021 – May 2023	Pre-University, Narayana Jr. College , Hyderabad	87%
Feb 2021	VRS & VJ Residential School , Hyderabad	84%

PROJECTS

ArogyaDham — Healthcare UI (HTML, CSS, JS) (April-2024)

- Built a unified healthcare platform integrating organ donation, blood donation, ambulance booking, and doctor appointments.
- Developed a responsive multi-page interface for seamless user experience.

Energy Harvesting in Cloud Computing (Kubernetes, Docker, Python) (November - 2025)

- Architected a containerized framework using Kubernetes and Docker to manage energy-efficient data processing.
- Implemented NSGA-II optimization algorithms for multi-objective resource allocation, benchmarked against standard greedy models.
- Built a React.js dashboard to visualize real-time energy metrics and system performance.

Opportunity Quest — Career Exploration Platform (Python, Django, HTML, CSS, JS) (November-2024)

- Built a web-based platform integrating real-time job and internship listings via API with secure authentication.
- Designed interactive dashboards with data-driven insights to support informed career decisions.

Cross-Asset Normalization Framework for Crypto Analytics (Hadoop, PySpark, MLlib, Streamlit) (May-2026)

- Built a Hadoop-PySpark pipeline to process data from 1,100+ crypto assets and store Parquet files in HDFS.
- Applied Spark MLlib for volatility analysis, trading signal prediction, and 365-day price forecasting with a Streamlit.

SKILLS

Languages	Python, Java
Cloud/DevOps	Kubernetes, Docker, Cloud Architecture Concepts
Web/Frameworks	Django, React.js, HTML, CSS, JavaScript,pyspark,Hadoop,Data Analytics
Core CS	OOP, DSA, OS, CN, DBMS
Tools	MATLAB, Wireshark, Packet Tracer, Git
Soft Skills	Teamwork, Leadership, Problem Solving, Communication

CERTIFICATIONS

- AWS Academy Cloud Foundation** – Issued by Amazon Web Services (AWS) (August - 2025)
- Computer Vision Fundamentals** – Issued by Great Learning (January - 2026)

ACHIEVEMENTS

- Selected for the **Live-in-Labs** program, collaborated with rural communities on sustainable solutions.
- Serving as **Class Representative**, coordinating academic activities and peer support.

LANGUAGES

English (Professional) — Telugu (Native)
